SUPERPHOS

Superphos polvere

The single super phosphate represents an extraordinary instrument for phosphatic fertilization as it is made from the most prestigious form of phosphorus. Its high contents of sulphur and pH acidity make it particularly suitable for

all soils in which the availability of phosphorus is critical. The soluble calcium and the micro-nutrients present enrich the existing nutritives of this irreplaceable phosphatic fertilizer.

ANALYSIS %

Phosphorus pentoxide (P_2O_5) soluble in neutral ammonium citrate

18

water-soluble

16.7

Water-soluble calcium oxide (CaO)

22

Water-soluble sulphur trioxide (SO_3)
