

Appearance  
**White crystalline  
powder**

pH  
**5,5**

Packaging  
**Bags 50 kg  
Pallet 2000 kg**

**AMMOSOL**

# Ammosol

Ammonium sulphate is a fertilizer characterized by nitrogen all in ammoniacal form and a high level of sulphur. The nitrogen

is the basic element of sulphate amino-acids and improves the qualitative level of the crops on which it is used.

## ANALYSIS %

**Azoto (N) ammoniacal** **21**

Water-soluble sulphur trioxide (SO<sub>3</sub>) **60**

## (kg/ha) DIRECTIONS FOR USE

40-50 **IN FERTIGATION ACCORDING TO CROP'S NEED**
